AMIT's Core Team

Mr
Tu Ngoc Nguyen (Leo)
Co-founder
Chief Commercial Officer

He graduated with a Bachelor's degree in Computer Science & Software Engineering from the University of Information Technology, and has over 13 years of experience in IT services industry. Mr. Leo has advanced skills in C++, Mobile Applications, Ontology, Java, Navigation Systems, and is an expert in project management.

Mr
Thao Quoc Le
Founder
Chief Executive Officer

Mr. Thao Quoc Le has more than 10 years of experience connecting people through TANG THU VIEN, an online community library platform. In February 2019, he founded AMIT GROUP - a software design and development company. With his extensive experience in building community, Mr. Thao has successfully enabled AMIT GROUP's members to collaborate effectively and fully utilize their capabilities.

Mr
Anh Nhat Tran (Richard)
Co-founder
Chief Operating Officer

With over 12 years of experience in managing operations, ensuring safety and quality, as well as implementing operational structures for the airline industry, he has actively contributed to a significant project aimed at optimizing aircraft recovery time. Currently, he holds the position of Chief Operating Officer at AMIT GROUP and is a certified Lean Six Sigma Black Belt, facilitating operational optimization and execution within the organization.

AMIT's Core Team

AMIT GROUP

Mr
Tien Pham Van
Logistics Solutions Manager

After graduating with a degree in Software Engineering and having over 19 years of experience in the IT industry, he has focused on developing comprehensive Warehouse & Transportation Management Systems for the past 12 years, which have served hundreds of large businesses. He currently holds the position of Director at TKSolutions, a Logistics software solutions company, and also leads the Logistics Solutions team at AMIT.

Mr
Duong Tung Tran
Healthcare Solutions Manager

He has over 12 years of experience in the field of IT and currently leads the ASP Solutions team specializing in the Healthcare sector. His team has developed VClinic HIS - a comprehensive management solution to apply digitalization and information technology to the Healthcare & Beauty industries. The product has been successfully implemented in over 500 Pharmacies, Spas, Medical & Wellness Centers across Vietnam.

Mr
Anh Hoang Tran
Hanoi Branch Manager

Having graduated from both FPT University and Hanoi University of Science and Technology, Mr. Anh Tran has 10 years of experience in Android & iOS development. He is also an expert in project management and leads the AMIT GROUP team in Hanoi. In addition, he holds the position of Director at TASC, a software development company based in Hanoi.

AMIT's Core Team

AMIT GROUP

Mr
Bach Duy Xuan Nguyen
IoT Solutions Manager

Having earned both bachelor's and master's degrees in IT from the Ho Chi Minh City University of Technology, Mr. Bach has been a lecturer at the university since 2016. With over 10 years of experience in embedded development, he has successfully completed numerous domestic and international projects. He is currently leading the IoT Solutions team at AMIT and also serves as the Director of Combros - a company specializing in IoT solutions.

Mr
Lam Phong Le (Robert)
Technical Manager

With a Bachelor's degree in Computer Science from the University of Technical Education and more than 13 years of experience in the IT field, he is currently leading AMIT GROUP's team of developers. In his role, he is instrumental in training the technical team to meet quality standards and provide customers with secure IT products.

Mr
Vuong Luu Quoc Tran
Director Of Supply Chain Management Solutions

With over 10 years of experience in the Manufacturing industry, he currently holds the position of Director of Supply Chain Management Solutions at AMIT GROUP. He plays a key role in advising and providing software solutions that support enterprise supply chain management, optimizing operational processes and maximizing business outcomes.

Monthly Active Users

Client: Tang Thu Vien   **OS:** Android & iOS

Technologies:

Client briefs:

Developing a mobile application to enhance the reading experience for users. Additionally, the application functions as a social network, enabling them to connect and interact with each other.

Solutions:

AMIT developed the project with key features such as:

- Downloading & reading Wuxia novels offline
- Customizable interface which allows users to change background color, text color, font, and reading mode
- Allowing readers to comment and interact with each other
- Saving the reading progress for each chapter
- Providing statistics on the most-viewed Wuxia novels of the year and month.

Project Experience

Project Name	Client	Project Details
HUS BMW Application - North America version	BMW	An application designed for the Head Up Screen (HUS) device installed on BMW car windshields, which provides real-time display of location information, speed, and other notifications. The device can be controlled through a wifi socket connection, and the application is compatible with Android/iOS. **Technologies:** Java/Objective-C/Socket service
Audi application	Audi	This application enables users to manage and control Blackbox operations on Audi vehicles, allowing them to connect and control Blackbox through wifi, review recorded videos from front and rear cameras, update firmware, and manage other features. **Technologies:** Java/Objective-C/Streaming Motion Jpeg Service
Mazda Application	mazda	The Android tablet app is designed to function as a Mazda car catalog, providing a virtual showroom for users to explore new car models. The app displays information on car colors and technical specifications, and allows for 360-degree image interaction. **Technologies:** Java/SQL Lite

Project Experience

Project Name	Client	Project Details
DHL Tracking App	DHL	An application that provides users with an easy way to track their parcels, while also offering detailed and accurate information about estimated delivery times and parcel locations. **Technologies:** Xcode/Swift/Java/Android Studio/Git/Trello/NodeJS with NestJS Framework
G-Link Application	Citicomm (Korea) CITICOMM	The Android application enables users to control the car navigation system and share navigation data with other devices through mirroring service. **Technology:** Java
PanUnited's Electronic Credit Application Form portal	PanUnited	The web portal allows businesses to create credit application forms, store customer information and credit scores in separate databases, handle multi-step processing, interact with departments and integrate with Oracle database. **Technologies:** - Javascript, Angular Framework - Microservices deployment - Containerizing with Docker & Kubernetes support - Language development: Java with Spring Framework, Spring Boot, Spring JPA, MySQL

Project Experience

Project Name	Client	Project Details
Streetlight Control	Citicomm (Korea) **CITICOMM**	A Window PC application for managing the streetlight system in South Africa, using Raspberry Pi and Gateway to monitor and control the street lights status. Users can easily track the system performance and make adjustments as needed. **Technologies:** Asp.net/HTML5/JS/AJAX/CSS/Qt/Socket service
ZIoT – Smarthome Light Control	Citicomm (Korea) **CITICOMM**	The smart-home lighting control application enables users to manage indoor lights via an Android app, with features such as setting modes and schedule settings for automatic switching on/off to save energy. **Technologies:** Java/SQL Lite/C#/ASP.net/MySQL/SQL server/Socket service
GO Application	GXO Corporation (VietNam) **Go** go-gxo	This mobile application allows users to book taxi, delivery, food ordering and shopping services. The app has a real-time backend system and data management to connect users with service providers and address their needs. **Technologies:** Xcode/Objective-C/Android Studio/Server Socket/NodeJS
